About Us

At Al Saud, our motto is to "Excel Customer's Expectations" at all times. We utilize an in-house laboratory and R&D to prioritize quality. Our advanced coating facility, equipped with the latest technology and machinery, along with round-the-clock service, ensures we excel in quality, delivery, and pricing simultaneously. Partnering with top international suppliers guarantees our products meet customer specifications with full traceability.

Major Facilities

Closed Air Exhaust Blast Room

Suction Equipped Painting Booth

In House Laboratory

Nickel Plating (2m x 1m x 1m)

Phosphating (2m x 2m x 2m)

Forced Air Circulated Oven (3.5m x 3.5m x 3.5m)

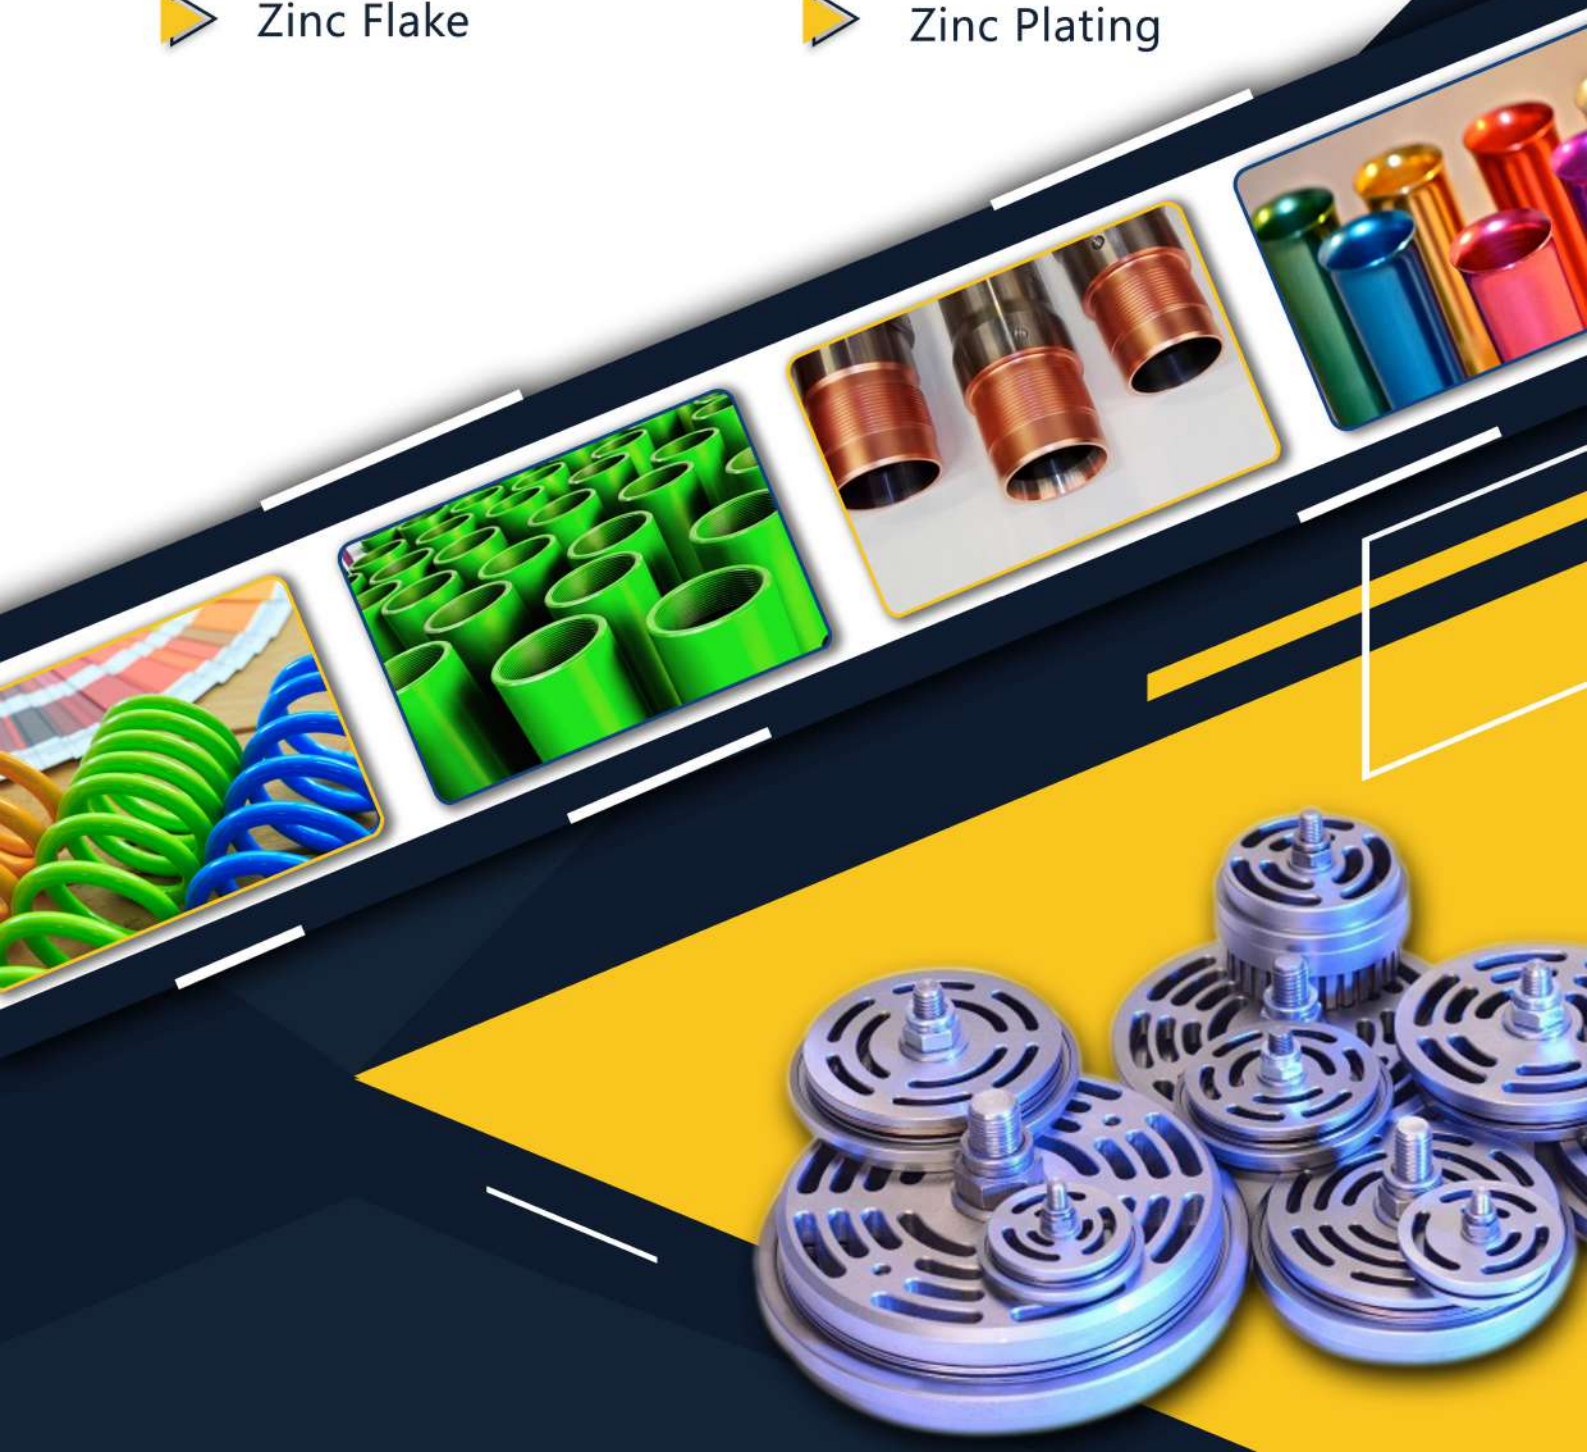

Anodizing (2m x 1m x 1m)

Copper Plating (1m x 1m x .75m)

Surface Coating

- PTFE Coating
- Non Stick Coating
- Phosphating
- Anodizing
- PTFE Lining
- Zinc Flake
- Nickel Plating
- Copper Plating
- Epoxy Coating
- Black Oxide Coating
- Powder Coating
- Zinc Plating

Quality

ASACS Operates an in house laboratory and Latest Testing Equipments to perform quality check on applied coating as per TDS & Various International Standards

Instruments & Methodology

- ▶ Salt Spray
- ▶ DFT : ASTM D7091-Electro Magnetic Method & SSPC PA-2
- ▶ Adhesion Test : ASTM D3359 Method B & ISO 2409
- ▶ Cure Test : ASTM D7835 , TM 115 A/B
- ▶ Visual Inspection Method
- ▶ Profile Inspection : ASTM D4417-B
